JANITORIAL
SERVICES

CASE STUDY: **COMMERCIAL BAKERY CLEANUP**

At Pro Squared Janitorial Services, our team specializes in integrated facility cleaning solutions. We deliver everything from customized recurring janitorial services and deep cleans in any industry, to supporting corporate sustainability initiatives by using environmentally friendly practices and green chemicals.

PROBLEM: One Thursday morning, a commercial bakery called our team. The Department of Agriculture had shut their facility down due to an outbreak of Listeria. The bakery needed Pro Squared to develop a cleaning protocol to kill off the bacteria and to sanitize the facility so they could restart production as soon as possible. It was costing them \$225,000 per day to be shut down.

SOLUTION: Within two hours, Pro Squared assembled a team composed of two engineers, a microbiologist and a chemist and were in the facility assessing the situation. By the end of that day, we developed a cleaning and sanitation protocol to remove all measurable traces of Listeria and other bacteria. With a team of 34 and an effective concoction of chemicals, we eliminated all traces of bacteria from the ceiling tiles down and into the floor drains.

RESULT: The following Monday, an inspector from the Department of Agriculture cleared the bakery to restart production. By partnering with Pro Squared, the bakery estimated that they got up and running 5 days earlier than they would have otherwise saving them over \$1M in downtime. "It was Pro Squared's resourcefulness, diligence, professionalism and speed that got us back up and running so quickly."
